

AIRBUS H135

MONT BLANC
HELICOPTERES

SEE FURTHER. GO ANYWHERE

One of Airbus' most successful light aircraft, the H135 is known for its endurance, compact build, low sound levels, reliability, versatility and cost-competitiveness. The H135 comes with the lowest operating and maintenance costs in its class.

This twin-engine helicopter can perform different missions, and can land almost anywhere, particularly in high and hot conditions, while carrying more payload over longer distances than other rotorcraft in its category.
